Beat Drugs Fund Association Governing Committee's report

The Governing Committee (GC) of the Beat Drugs Fund Association (the Association) presents its annual report together with the audited financial statements for the year ended 31 March 2021.

Principal Activity

The Association operates as a non-profit making association to promote worthwhile anti-drug activities.

Financial Statements

The financial performance and cash flows of the Association for the year ended 31 March 2021 and the Association's financial position at that date are set out in the financial statements on pages 10 to 31.

Funds

Details of movements in the funds of the Association during the year are set out in the statement of changes in funds on page 12.

Governing Committee Members

The composition of the GC during the year and up to the date of this report was:

Chairman

Ms YIP Man-kuen, JP Permanent Secretary for Security

Members

Dr CHU Sau-kwan	
Mr YEUNG Chi-wai, MH	
The Hon CHAN Han-pan, BBS, JP	
Mr SIU Miu-man, MH	
Ms WONG Chor-kei	
Mr WONG Shing-hei, JP	Director of Accounting Services (Retired on 14 October 2021)
Ms Susanna CHEUNG Sau-lan, JP	Director of Accounting Services (Appointed on 14 October 2021)
Ms Ivy LAW Chui-mei, JP	Commissioner for Narcotics
Ms LI Mung-yee	Representative of the Director of Social Welfare (Retired on 30 August 2021)
Ms WONG Siu-fan	Representative of the Director of Social Welfare (Appointed on 30 August 2021 and retired on 20 September 2021)
Mr WONG Kwok-chun	Representative of the Director of Social Welfare (Appointed on 20 September 2021)
Dr Verena LAU Wing-yin	Representative of the Secretary for Education (Retired on 1 October 2020)
Ms CHOW Yeuk-lan	Representative of the Secretary for Education (Appointed on 1 October 2020)

In accordance with Article 31 of Part B of the Association's Articles of Association, Dr CHU Sau-kwan, Mr YEUNG Chi-wai, MH, The Hon CHAN Han-pan, BBS, JP, Mr SIU Miu-man, MH and Ms WONG Chor-kei (all being committee members appointed by the Permanent Secretary for Security) shall retire at the coming Annual General Meeting (AGM) and be eligible to offer themselves for re-appointment.

Indemnity of members of Governing Committee

The permitted indemnity provision in force for the benefit of the GC Members of the Association is set out in Article 60 of Part B of the Articles of Association.

Governing Committee Members' Interests in Transaction, Arrangement or Contract

At no time during the year was the Association a party to any transaction, arrangement or contract in which a member of the GC of the Association had, directly or indirectly, a material interest.

Auditor

PKF Hong Kong Limited was appointed as auditor of the Association upon retirement of Baker Tilly Hong Kong Limited at the 2020 AGM. A resolution for the re-appointment of PKF Hong Kong Limited as auditor of the Association is to be proposed at the forthcoming AGM.

Beat Drugs Fund Association Business review

Overview of the Operation and Annual Performance

The Beat Drugs Fund (the Fund) was established in 1996 with a capital base of HK\$350 million to provide funding support for worthwhile anti-drug projects through its investment income. It is administered by the Association, which is a non-profit making company limited by guarantee incorporated under the Companies Ordinance (Cap. 622). A GC, comprising both official and non-official members, is set up to oversee the administration and investment of the Fund, as well as to consider and approve funding applications, having regard to the recommendations of relevant Government bureaux and departments, as well as the Action Committee Against Narcotics (ACAN).

The Government injected HK\$3 billion into the Fund in 2010, increasing the capital base to HK\$3.35 billion.

Principal Activities Performance

Taking into account the emerging needs of certain areas of anti-drug work, the GC, in consultation with ACAN, has launched various funding schemes, including –

- (a) the Regular Funding Scheme (RFS) which supports community-driven anti-drug activities and programmes on preventive education and publicity (PE&P), treatment and rehabilitation (T&R), and research;
- (b) the Special Funding Scheme (SFS) for Drug Dependent Persons Treatment and Rehabilitation Centres (DTRCs) which provides financial assistance to help DTRCs meet the licensing requirements stipulated in the Drug Dependent Persons Treatment and Rehabilitation Centres (Licensing) Ordinance (Cap. 566) with a view to obtaining a licence and support their sustained efforts in enhancing service capacity and sophistication. It also covers the works connected with the in-situ expansion or redevelopment/re-provisioning of existing DTRCs;
- (c) the Healthy School Programme with a Drug Testing Component (HSP(DT)) which is a school-based preventive education initiative for implementation in secondary schools, comprising preventive anti-drug activities and voluntary drug testing;
- (d) the “Beat Drugs with Sports” Programme (formerly known as the “Participate in Sports, Stay Away from Drugs” Programme) which is a school-based student-led preventive education initiative for implementation in secondary schools and aims to promote healthy lifestyles and an anti-drug culture; and
- (e) the Anti-drug Community Awareness Building Programme (ACAB) which is implemented in collaboration with the District Fight Crime Committees (DFCCs) and District Offices for launching preventive initiatives to enhance the anti-drug awareness in the local communities.

In 2020-21 financial year, the funding grants and activities of the five schemes are set out in the ensuing paragraphs.

• RFS

Applications under the 2020 RFS were invited in August 2020. Specific priority areas were drawn up with reference to various factors including prevalent drug trends and pertinent service needs to encourage quality submission of proposals for anti-drug projects meeting the community needs.

In 2020-21 financial year, a total of 60 projects covering PE&P, T&R, research and mixed-type projects were approved under the RFS, with a total funding grant of about HK\$142.14 million.

- *SFS*

In 2020-21 financial year, a top-up grant of HK\$0.9 million for an existing project was approved under the SFS.

- *HSP(DT)*

In 2020-21 financial year, the GC approved a grant of about HK\$123.17 million for 99 secondary schools and their partnering non-governmental organisations (NGOs) to implement the HSP(DT) for one school year or three consecutive school years. This brought the total number of schools participating in the programme to 182.

- *ACAB*

The Fund launched the first round of ACAB on a trial basis in 2013. Noting the merits of the ACAB and the need to sustain the momentum in community-driven anti-drug work, the GC approved the launch of the second (from 1 April 2015 to 31 March 2018), third (1 April 2018 to 31 March 2021) and fourth rounds (from 1 April 2021 to 31 March 2024) of ACAB. For the fourth round of ACAB launched in April 2021, each DFCC has been granted a maximum of HK\$500,000, including a specific amount of HK\$100,000 dedicated to activities/projects against drug trafficking which aims at enhancing the education for members of the public about the severity of drug offences in Hong Kong and the consequences of committing such offences, as well as raising relevant law-abiding awareness.

- *“Beat Drugs with Sports” Programme*

The “Beat Drugs with Sports” Programme was launched on a trial basis in the 2017/18 school year. Having received positive feedback and comments, the GC approved in the 2020-21 financial year a grant of about HK\$2 million for 100 secondary schools to continue to implement the Sports Programme in the 2020/21 school year.

Information on the approved active RFS projects up to 31 March 2021 is shown at Appendix A. A summary of approved grants and outstanding commitments of all funding schemes as at 31 March 2021 is shown at Appendix B.

Financial Indicators

The Fund’s investment portfolio is expected to fetch over time a return of about 4% per annum to provide financial support to anti-drug projects. For the financial year ended 31 March 2021, the Fund recorded a return of about 22.3%.

For the profit or loss and details of income information of the Fund, please refer to page 11 of this document.

Important Events or Changes

The Association appointed Tricor Corporate Secretary Limited to act as the Company Secretary on 1 March 2021.

Description of the Principal Risks and Uncertainties Facing the Association

A detailed analysis of the Fund’s financial risks, including credit risk, liquidity risk, currency risk, interest rate risk, equity price risk and other financial risks, is set out in note 13 to the financial statements.

Looking Ahead

Over the years, the Fund has provided substantive grants to support worthwhile anti-drug projects. The Association will continue to sustain efforts to support anti-drug projects and initiatives that could respond to the changing drug scene and rise to challenges of new threats.

In the coming year, the Association would continue to work with ACAN to draw up specific priority areas for the RFS to guide applicants in planning suitable anti-drug projects in response to the latest drug scene. The Association would continue to provide funding support under the SFS to DTRCs in fulfilling statutory licensing requirements. The Association would continue the efforts to progressively roll out the HSP(DT) to more secondary schools to help foster a drug-free culture in schools. The “Beat Drug with Sports” Programme would continue to be implemented in the 2021/22 school year in view of the positive feedback and comments since its implementation in the 2017/18 school year. Some enhancements would be made to the “Beat Drug with Sports” Programme to increase its attractiveness in the 2021/22 school year.

The Association also approved in October 2020 to set aside HK\$300 million under the Fund to provide financial support for a Government initiative to provide targeted and sustained support for persons with the most pressing mental health needs. The initiative is being co-ordinated by the Advisory Committee on Mental Health with the support of the Food and Health Bureau (FHB). The funding will be disbursed to the FHB by phases, tentatively with HK\$100 million per year for a total of three years. The first HK\$100 million was disbursed to FHB on October 2021.

To facilitate grantees of the Fund to implement projects affected by COVID-19, applicants or grantees for RFS, HSP(DT), Beat Drugs with Sports and ACAB have been required to prepare for flexible delivery modes of activities or contingency plans for projects (e.g. switching to online modes). Meanwhile, the Association first approved in May 2020 to further delegate authority to the Secretariat of the Association to approve certain valid project variations under RFS arising from the pandemic. In light of the potentially lasting disruptions of the pandemic to the activities of the community, the Association extended the delegation of authority in December 2020 and September 2021 respectively to cover applications for variation made within the calendar years from 2021 to 2023.

Environmental Policy and Performance

The Association is committed to achieving environmental protection. We adopt environmentally-friendly policies, which are consistent with the government requirement. We also advocate the importance of environmental protection. Project grantees are also encouraged to adopt environmentally-friendly measures in project implementation.

Compliance with Relevant Laws/Regulations with Significant Impact

The Association endeavours to comply with all relevant laws and regulations, and there is no compliance matter with significant impact.

An Overview of the Association's Relationship with its Stakeholders

Advisory Bodies

As the Government's main advisory body on anti-drug policies and programmes, ACAN closely monitors the latest drug situation and conducts periodic reviews on the priorities of anti-drug measures, taking into account relevant factors such as the latest drug trend, updated anti-drug policies and strategies, feedback from relevant sectors, etc. The advice of ACAN provides an important reference to the Association in determining the direction and work plan of the Fund, as well as ensuring the effective deployment of funds to meet emerging needs in the anti-drug cause.

The investment strategies of the Fund are formulated and executed within the scope approved by the Association on advice of its Investment Sub-Committee.

Collaborating with NGOs/Engaging Practitioners

Apart from partnership with the advisory bodies, the Association maintains a good collaborative relationship with various NGOs and practitioners in the medical, education, social services and private sectors in promoting anti-drug projects which help to tackle the drug problem in Hong Kong.

On the T&R front, the Association maintains a close relationship with the anti-drug sector and relevant stakeholders in the social services, medical and other related sectors to enable the provision of holistic treatment and rehabilitation services for drug abusers and help minimise their relapse through strengthened cross-sectoral collaboration. The Association also works closely with partners to promote training and sharing of good collaboration practices to enhance the skills and knowledge of frontline workers and healthcare professionals in handling the increasingly complex psychotropic substance abuse cases. Following an extensive consultation with the stakeholders in the anti-drug sector, the Three-year Plan on Drug Treatment and Rehabilitation Services in Hong Kong (2021 – 2023) was promulgated in March 2021, setting out broad strategic directions to facilitate anti-drug service providers in reviewing and developing their own action plans and programmes having regard to the latest drug scene.

On the PE&P front, the school is an important platform for cultivating a drug resistant attitude among young people. The Association engages the school sector, including school sponsoring bodies and relevant stakeholders, to promote the implementation of the HSP(DT) and the "Beat Drugs with Sports" Programme. The Association also maintains close collaboration with DFCCs and community stakeholders to widen the district anti-drug network and empower members of the community such as parents/family members, and relevant community stakeholders in furtherance of the anti-drug cause.

On behalf of the GC of the Association

Ms YIP Man-kuen
Chairman
15 November 2021

**Independent auditor's report to the members of
Beat Drugs Fund Association
(Incorporated in Hong Kong with limited liability by guarantee)**

Opinion

We have audited the financial statements of Beat Drugs Fund Association (the "Association") set out on pages 10 to 31, which comprise the statement of financial position as at 31 March 2021, and the statement of profit or loss and other comprehensive income, statement of changes in funds and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the financial statements give a true and fair view of the financial position of the Association as at 31 March 2021, and of its financial performance and its cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards ("HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA") and have been properly prepared in compliance with the Hong Kong Companies Ordinance.

Basis of opinion

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSA") issued by the HKICPA. Our responsibilities under those standards are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report. We are independent of the Association in accordance with the HKICPA's Code of Ethics for Professional Accountants (the "Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other matter

The financial statements of the Association for the year ended 31 March 2020 were audited by another independent auditor whose report dated 16 November 2020 and expressed an unmodified opinion on those financial statements.

Other information

The Governing Committee ("GC") of the Association is responsible for the other information. The other information comprises the information included in the GC's report and the business review for the year ended 31 March 2021, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

**Independent auditor's report to the members of
Beat Drugs Fund Association
(Incorporated in Hong Kong with limited liability by guarantee)**

Governing Committee's responsibilities for the financial statements

The GC of the Association is responsible for the preparation of financial statements that give a true and fair view in accordance with HKFRSs issued by the HKICPA and the Hong Kong Companies Ordinance, and for such internal control as the GC of the Association determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the GC of the Association is responsible for assessing the Association's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the GC of the Association either intends to liquidate the Association or to cease operations, or have no realistic alternative but to do so.

The GC of the Association is responsible for overseeing the Association's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Our report is made solely for you, as a body, in accordance with section 405 of the Hong Kong Companies Ordinance, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with HKSAAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also -

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Association's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the GC of the Association.

**Independent auditor's report to the members of
Beat Drugs Fund Association
(Incorporated in Hong Kong with limited liability by guarantee)**

Auditor's responsibilities for the audit of the financial statements (cont'd)

- Conclude on the appropriateness of the GC of the Association's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Association's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Association to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the GC of the Association regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The engagement director on the audit resulting in this independent auditor's report is Tan Yik Chung Wilson (Practising Certificate Number: P05103).

Beat Drugs Fund Association
Notes to the financial statements
For the year ended 31 March 2021

1. General information

Beat Drugs Fund Association (the "Association") was incorporated on 28 March 1996 in Hong Kong with its liability limited by guarantee. The registered office of the Association is located at Narcotics Division, Security Bureau, 30/F., High Block, Queensway Government Offices, 66 Queensway, Hong Kong.

The Association operates as a non-profit making association to promote worthwhile anti-drug activities.

These financial statements are presented in Hong Kong dollars, which is the same as the functional currency of the Association, and all values are rounded to the nearest thousand except where otherwise indicated.

2. Significant accounting policies

(a) Statement of compliance

These financial statements have been prepared in accordance with all applicable Hong Kong Financial Reporting Standards ("HKFRSs"), which is a collective term that includes all applicable individual HKFRSs, Hong Kong Accounting Standards ("HKASs") and Interpretations issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"), and accounting principles generally accepted in Hong Kong. These financial statements also comply with the applicable requirements of the Hong Kong Companies Ordinance. A summary of the significant accounting policies adopted by the Association is set out below.

The HKICPA has issued certain new and revised HKFRSs that are first effective or available for early adoption for the current accounting period of the Association. There have been no significant changes to the accounting policies applied in these financial statements as a result of these developments.

(b) Basis of preparation of the financial statements

The measurement basis used in the preparation of the financial statements is historical cost except that financial assets at fair value through profit or loss and derivative financial instruments are measured at fair value as explained in the accounting policies set out below in Note 2(c).

The preparation of financial statements in conformity with HKFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income and expenditure. The estimates and associated assumptions are based on experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgements about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Beat Drugs Fund Association
Notes to the financial statements
For the year ended 31 March 2021

2. Significant accounting policies (cont'd)

(b) Basis of preparation of the financial statements (cont'd)

There are no critical accounting judgements involved in the application of the Association's accounting policies. There are neither key assumptions concerning the future, nor other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities in the next year.

(c) Financial assets and financial liabilities

(i) Initial recognition and measurement

The Association recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instruments. Regular way purchases and sales of financial instruments are recognised and derecognised on trade date, the date on which the Association commits to purchase or sell the instruments.

At initial recognition, financial assets and financial liabilities are measured at fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss account, transaction costs that are directly attributable to the acquisition of the financial assets or the issue of the financial liabilities. Transaction costs of financial assets and financial liabilities measured at fair value through profit and loss account are expensed immediately. An explanation of how the Association determines the fair value of financial instruments is set out in Note 13(g).

(ii) Classification and subsequent measurement

Financial instruments measured at fair value through profit or loss

These comprise equity and debt securities and derivative financial instruments. They are subsequently measured at fair value. Changes in fair value are included in surplus or deficit in the period in which they arise.

Derivative financial instruments used by the Association to manage its risks associated with foreign currency fluctuations do not qualify for hedge accounting. They are presented as assets when the fair value is positive and as liabilities when the fair value is negative.

Financial assets measured at amortised cost

These comprise cash at banks, deposits with banks and other financial institutions managed by fund managers, interest and dividend receivables, receivables managed by fund managers and placement with the Exchange Fund. They are held for the collection of contractual cash flows which represent solely payments of principal, dividend and interest. They are subsequently measured at amortised cost using the effective interest method. The measurement of loss allowances for these financial assets is based on the expected credit loss model as described in Note 2(c)(vi).

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating and recognising the interest income or interest expense over the relevant period. The effective interest rate is the

2. Significant accounting policies (cont'd)

(c) Financial assets and financial liabilities (cont'd)

(ii) Classification and subsequent measurement (cont'd)

Financial assets measured at amortised cost (cont'd)

rate that exactly discounts estimated future cash receipts or payments through the expected life of the financial asset or financial liability to the gross carrying amount of the financial asset or to the amortised cost of the financial liability. When calculating the effective interest rate, the Association estimates the expected cash flows by considering all contractual terms of the financial instrument but does not consider the expected credit losses. The calculation includes all fees received or paid between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Financial liabilities measured at amortised cost

These comprise payables and other liabilities other than derivative financial instruments. They are subsequently measured at amortised cost using the effective interest method.

The Association reclassifies a financial asset when and only when it changes its business model for managing the assets. A financial liability is not reclassified.

(iii) Fair value measurement principles

The Association measures its investments in securities and derivative financial instruments at fair value at the end of each reporting period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either (a) in the principal market for the asset or liability, or (b) in the absence of a principal market, in the most advantageous market for the asset or liability; and the Association has access to these markets at the measurement date.

The fair value of an asset or a liability is measured with those assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

The Association uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. The Association measures fair values using the following fair value hierarchy that reflects the significance of inputs used in making the measurements:

Level 1 – fair values are quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – fair values are determined with inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Beat Drugs Fund Association
Notes to the financial statements
For the year ended 31 March 2021

2. Significant accounting policies (cont'd)

(c) Financial assets and financial liabilities (cont'd)

(iii) Fair value measurement principles (cont'd)

Level 3 – fair values of financial instruments are determined with inputs that are not based on observable market data (unobservable inputs).

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Association determines whether transfers between levels in the hierarchy should be reflected in the financial statements by re-assessing categorisation (based on the level of input that is most significant and relevant to the fair value measurement as a whole) at the end of the reporting period.

(iv) Derecognition

A financial asset is derecognised when the contractual rights to receive the cash flows from the financial asset expire, or where the financial asset together with substantially all the risks and rewards of ownership have been transferred.

The Association uses the weighted average method to determine realised gains and losses to be recognised in surplus or deficit on derecognition of financial assets.

A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or when it expires.

(v) Offsetting

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liabilities simultaneously.

(vi) Credit losses and impairment of financial assets

For financial assets measured at amortised cost, the Association measures the expected credit losses to determine the loss allowance required to be recognised. Financial instruments measured at fair value through profit or loss are not subject to the expected credit loss assessment.

Expected credit losses are a probability-weighted estimate of credit losses. They are based on the difference between the contractual cash flows due in accordance with the contract and the cash flows that the Association expects to receive, discounted at the effective interest rate. They are measured on either of the following bases:

- 12-month expected credit losses (for financial instruments for which there has not been a significant increase in credit risk since initial recognition); these are losses that are expected to result from possible default events within the 12 months after the reporting date; and

Beat Drugs Fund Association
Notes to the financial statements
For the year ended 31 March 2021

2. Significant accounting policies (cont'd)

(c) Financial assets and financial liabilities (cont'd)

(vi) Credit losses and impairment of financial assets (cont'd)

- Lifetime expected credit losses (for financial instruments for which there has been a significant increase in credit risk since initial recognition): these are losses that are expected to result from all possible default events over the expected life of the financial instrument.

In assessing whether the credit risk of a financial instrument has increased significantly since initial recognition, the Association compares the risk of default occurring on the financial instrument assessed at the reporting date with that assessed at the date of initial recognition. In making this assessment, the Association considers that a default event occurs when (i) the borrower is unlikely to pay its credit obligations to the Association in full; or (ii) the financial asset is 90 days past due. The Association considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

(d) Revenue recognition

(i) Interest income

Interest income is recognised in surplus or deficit on an accrual basis, using the effective interest method.

(ii) Dividend income

Dividend income from equity securities is recognised in surplus or deficit when the share price is quoted ex-dividend.

(iii) Net realised and fair value gains/losses

Realised gains or losses on financial instruments are recognised in surplus or deficit when the financial instruments are derecognised. Changes in fair value of derivative financial instruments and financial assets at fair value through profit or loss are recognised as fair value gains or losses in surplus or deficit in the period in which they arise.

(iv) Other income

Other income is recognised in surplus or deficit on an accrual basis.

(e) Grants recognition

Grants are recognised as expenditure when they are approved except in those cases where the release of grant is subject to certain conditions, such grants are only recognised as expenditure when the conditions are met.

Notes to the financial statements
For the year ended 31 March 2021

2. Significant accounting policies (cont'd)

(f) Employee benefits

Salaries, contract gratuities, annual leave entitlements and the cost to the Association of non-monetary benefits are accrued in the year in which the associated services are rendered by employees of the Association.

Obligations for contributions to defined contribution retirement plan under the Hong Kong Mandatory Provident Fund Schemes Ordinance are recognised as an expense in surplus or deficit as incurred.

Termination benefits are recognised when, and only when, the Association demonstrably commits itself to terminate employment or to provide benefits as a result of voluntary redundancy by having a detailed formal plan which is without realistic possibility of withdrawal.

(g) Foreign currency translation

Foreign currency transactions during the year are translated into Hong Kong dollars at the spot exchange rates at the transaction dates. Monetary assets and liabilities denominated in foreign currencies are translated into Hong Kong dollars at the closing exchange rates at the end of the reporting period. All foreign currency translation differences are recognised in surplus or deficit. Non-monetary assets and liabilities carried at fair value denominated in foreign currencies are translated at the rates prevailing at the date when the fair value was determined and the exchange differences arising are recognised in surplus or deficit, except for the exchange component of a gain or loss that is recognised directly in equity.

(h) Cash and cash equivalents

For the purpose of the statement of cash flows, cash and cash equivalents include cash at banks and deposits with banks and other financial institutions having a maturity within three months when placed.

3. Taxation

No provision for Hong Kong profits tax has been made in these financial statements as the Association is exempted from Hong Kong profits tax under section 88 of the Hong Kong Inland Revenue Ordinance.

4. Governing Committee members' remuneration

No remuneration as defined in section 383 to the Hong Kong Companies Ordinance was paid or payable to any GC members during the current and last year.

	HK\$'000	HK\$'000
Bank time deposits having a maturity of more than three months when placed	317,364	370,803
Short-term bank time deposits having a maturity within three months when placed	100,000	93,928
Cash at banks	<u>21,517</u>	<u>14,689</u>
	<u>438,881</u>	<u>479,420</u>

All of the bank time deposits earn interest at rates ranging from 0.13% to 2.6% (2020 : 1.2% to 3.4%) per annum.

11. Capital fund

The Association is a company limited by guarantee and not having a share capital. In accordance with the Association's Articles of Association, the liability of each member is limited by guarantee to HK\$100 each.

The capital fund balance of HK\$3,350 million represents the sum of two grants received from the Government, one for HK\$350 million received in March 1996 and the other for HK\$3,000 million received in June 2010. Under the Association's Articles of Association, the Association is permitted to invest and deal with the moneys of the Association not immediately required for its purposes in or upon such investments, securities or property as may be thought fit subject to such conditions and such consents as may from time to time be imposed by the Financial Secretary or the Secretary for Financial Services and the Treasury.

Less : Bank time deposits having a maturity of more than three months when placed (Note 10)	(317,364)	(370,803)
Cash and cash equivalents	151,936	137,834

13. Financial risk management objective and policies

(a) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss to the Association by failing to discharge an obligation. The Association's credit risk is principally attributable to bank balances, placement with the Exchange Fund and debt securities. The Association selects issuer or counterparty with good credit standing, strong financial strength and sizable capital. The Association also limits the individual exposure, in accordance with a documented risk management and investment strategy and monitors credit risk on a continuous basis. The credit risk on these financial instruments is assessed as not having increased significantly since initial recognition and the Association determines the loss allowance required to be recognised based on 12-month expected credit losses. The Association has estimated that 12-month expected credit losses on these financial instruments are immaterial and considers that no loss allowance is required.

The Association's maximum exposure to credit risk as at 31 March 2021 and 31 March 2020 without taking account of collateral held or other credit enhancements, if any, were as follows -

	2021 HK\$'000	2020 HK\$'000
Cash at banks and financial institutions	51,936	43,906
Bank time deposits	417,364	464,731
	469,300	508,637
Debts securities	1,209,121	1,175,006
Placement with the Exchange Fund	650,268	627,066

13. Financial risk management objective and policies (cont'd)

(a) Credit risk (cont'd)

The credit quality of cash at banks, deposits with banks and other financial institutions and debt securities at the end of the reporting period, analysed by the ratings designated by Moody's or their equivalents, is shown below -

	2021 HK\$'000	2020 HK\$'000
Cash at banks and bank time deposits, by credit rating		
Aa3 to Aa1	101,147	29,242
A3 to A1	368,153	479,395
	469,300	508,637
Debt securities, by credit rating		
Aaa	282,792	286,413
Aa3 to Aa1	351,440	357,882
A3 to A1	572,016	525,729
Baa3 to Baa1 ¹	2,873	4,982
	1,209,121	1,175,006
	1,678,421	1,683,643

¹ The relevant debt securities had a credit rating of "A3" or above at their acquisition dates.

(b) Liquidity risk

Liquidity risk is the risk that the Association will encounter difficulty in meeting obligations associated with financial liabilities. The Association monitors the liquidity requirements on a continuous basis and maintains a level of short-term deposits and cash to pay grants and operating expenses as necessary. Hence the Association does not have significant exposure to liquidity risk.

Maturities of the non-derivative financial liabilities that will be settled on a net basis of the Association as at 31 March 2021 and 31 March 2020 were as follows -

	2021 HK\$'000	2020 HK\$'000
Total amounts of contractual undiscounted obligations		
Payables managed by fund managers	27,704	13,390

Due for payment		
Within one year	<u>1,620,554</u>	<u>1,539,305</u>

(c) Currency risk

Currency risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to the changes in currency exchange rates. The Association's non-Hong Kong dollar investments are exposed to currency risk. The Association only makes investments denominated in Hong Kong dollar, United States dollar and currency of a country whose foreign currency long-term debt has a high credit rating. The Association's exposure to currency risk is handled in accordance with a documented risk management and investment strategy, and the Association monitors the currency risk on a continuous basis.

Carrying amounts of net financial assets, after taking into account the effect of forward currency contracts, as at 31 March 2021 and 31 March 2020 exposed to currency risk were as follows -

	2021		
	Monetary assets HK\$'000	Non-monetary assets HK\$'000	Total HK\$'000
Euro	100,853	286,436	387,289

Others	+/- 639	+/- 2,528	+/- 3,167
	<u>+/- 38,596</u>	<u>+/- 56,405</u>	<u>+/- 95,001</u>

Due to the linked exchange rate of the US dollar relative to the Hong Kong dollar, the Association does not have significant exposure to currency risk for its US dollar-denominated assets.

(d) Interest rate risk

Interest rate risk is the risk that the fair value of financial instruments will fluctuate because of changes in market interest rates. The Association's debt securities stated at fair value are exposed to interest rate risk. Investments in debt securities stated at fair value are made in accordance with a documented risk management and investment strategy, and the Association monitors the interest rate risk on a continuous basis.

As regards deposits with banks, since they are all stated at amortised cost, their carrying amounts and the Association's income and accumulated funds will not be affected by changes in market interest rates.

The table below sets out the Association's exposure to the fair value interest rate risk. If the interest rates had been 100 basis points higher/lower with all other variables held constant, the impact on the income for the year would have been as follows -

	<i>2021 HK\$'000</i>	<i>2020 HK\$'000</i>
Effect on income for changes in interest rates +/- 100 basis points	<u>-/+ 75,763</u>	<u>-/+ 78,591</u>

Beat Drugs Fund Association
Notes to the financial statements
For the year ended 31 March 2021

13. Financial risk management objective and policies (cont'd)

(e) Equity price risk

Equity price risk is the risk of loss arising from changes in equity prices. The Association's equity securities are subject to the equity price risk inherent in all equity securities i.e. the value of holdings may fall as well as rise. At 31 March 2021, the equity securities were included in financial assets at fair value through profit or loss as shown in Note 7. The risk is primarily addressed through diversification of investment portfolio in accordance with a documented risk management and investment strategy, and the Association monitors the equity price risk on a continuous basis.

If the market bid prices of the equity securities had increased/decreased by 5% with all other variables held constant, the impact on the income for the year would have been as follows -

	2021 HK\$'000	2020 HK\$'000
Effect on income for changes of +/- 5% in prices	<u>+/- 130,623</u>	<u>+/- 93,009</u>

(f) Other financial risk

The Association is exposed to financial risk arising from change in the interest rate on the placement with the Exchange Fund which is determined every January (Note 6). It was estimated that, as at 31 March 2021, a 50 basis points increase/decrease in the interest rate, with all other variables held constant, would increase/decrease the income for the year by HK\$ 3.3 million (2020: HK\$3.1 million).

(g) Fair values

(i) Financial instruments measured at fair value on a recurring basis

The fair value of financial instruments classified under Level 1 is based on the quoted market prices of these financial instruments at the end of the reporting period, without any deduction for estimated future selling costs.

In the absence of such quoted prices, the fair value of financial instruments classified under Level 2 is estimated using present value or other valuation techniques which maximise the use of observable data, using inputs based on market conditions existing at the end of the reporting period.

The following table presents the carrying value of financial instruments measured at fair value at 31 March 2021, categorised into the three-level fair value hierarchy as defined in HKFRS 13, Fair Value Measurement.

Beat Drugs Fund Association
Notes to the financial statements
For the year ended 31 March 2021

All other financial instruments are stated in the statement of financial position at amounts equal to or not materially different from their fair values.

Beat Drugs Fund Association
Notes to the financial statements
For the year ended 31 March 2021

13. Financial risk management objective and policies (cont'd)

(h) Investment management and control

In accordance with Article 3(K) of the Part A of the Articles of Association of the Association, moneys of the Association not immediately required for its purposes shall be invested in such investments, securities or property as may be thought fit subject to such conditions and such consents as may from time to time be imposed by the Financial Secretary or the Secretary for Financial Services and the Treasury.

Article 37 of the Part B of the Articles of Association provides that the business of the Association should be managed by the Governing Committee whose composition is specified in Article 3 of the Part B of the Articles of Association. Pursuant to Article 37 of the Part B of the Articles of Association, the Governing Committee has exercised its power and appointed an Investment Sub-Committee to advise on investment matters.

The principal investment objective is, as far as practicable, to maintain the capital fund intact in the long run and to produce a stable income sufficient to support the annual expenditure of the Association.

The investment management and control of the Association are set out in a documented risk management and investment strategy and reviewed on a regular basis by the Investment Sub-Committee and the Governing Committee.

14. Possible impact of amendments, new standards and interpretations issued but not yet effective for the year ended 31 March 2021

Up to the date of issue of the financial statements, the HKICPA has issued a number of amendments, new standards and interpretations which are not yet effective for the year ended 31 March 2021 and which have not been early adopted in the financial statements. The Association is in the process of making an assessment of the impact expected of these amendments, new standards and interpretations in the period of initial adoption. So far, it has concluded that the adoption of them is unlikely to have a significant impact on the financial statements.

GRANTS TO APPROVED ACTIVE REGULAR FUNDING SCHEME PROJECTS
(as at 31 March 2021)

<u>Agency</u>		<u>Project</u>	<u>Approved Grant HK\$</u>	<u>Project Brief and Progress up to 31 March 2021</u>

Sub-total			7,309,027.00	

IV. Projects Approved in 2016 Funding Exercise

(a) Treatment and Rehabilitation				
1	Caritas - Hong Kong	Gato House	3,585,276.00	Project completed. The project aimed at improving the mental health and life skills of drug abusers and rehabilitees through animal-assisted activities. Project activities included animal-assisted therapy drug counselling (e.g. individual-based and group counselling, life and death education), animal-assisted vocational training cum work placement and outreaching services.

<u>Agency</u>		<u>Project</u>	<u>Approved Grant</u> HK\$	<u>Project Brief and Progress up to 31 March 2021</u>
2	Yang Memorial Methodist Social Service	No Drugs Home with Love	4,338,480.50	Project completed. The project aimed at strengthening the support to ethnic minority drug abusers and rehabilitates, their family members and children. It also aimed at enhancing the anti-drug knowledge of community members of ethnic minority and drug abusers' motivation to seek help and quit drugs. The project provided community-based services to ethnic minority community including outreach and individual counselling, mutual help group and peer educator training, family counselling, children playgroups and community education talk.
(b) Mixed-type				
3	The Hong Kong Federation of Youth Groups	Project EVER – Drug Counselling Program with Virtual and Activity Based	5,142,632.00	Project completed. The project aimed at adopting a “stepped-care model” for early identification and intervention for high-risk youth and drug abusers with mental health issues using virtual reality and activity-based exercises. Project elements included early detection and prevention, low-intensity intervention and drug risk containment, high-intensity therapy and professional development. Assessments on integrated mental health and risk for drug use for students/youths/young adults outside the school network were conducted. High-risk youths, drug abusers with mental health and emotional issues and family members would receive different levels of intervention services.
4	The Hong Kong Federation of Youth Groups	Begin from Family	4,679,632.00	Project completed. The project aimed at improving parenting skills and family relationships, as well as reducing criminal and drug abuse problems among at-risk youths and young drug abusers. A screening tool would first be developed in collaboration with university scholars for the identification of high-risk families. Multi-level training was organised for at-risk families or families with drug-abusing members. A localised counselling handbook was published.
5	The Hong Kong Federation of Youth Groups	‘Project SEToff’ – Anti-Drug Program for Working Youth and Hidden Drug Abusers	3,315,412.00	Project completed. The project aimed at identifying potential drug abusing youths and facilitating drug abusers to reintegrate into society. Project elements included producing anti-drug videos in collaboration with YouTube, establishing social media platform for promotion of positive lifestyle and launching of “caring workplace” campaign for dissemination of anti-drug messages, building referral mechanism, providing physical check-up, mental health assessment, brief solution-focused therapeutic intervention, and cognitive behavioural therapy for drug abusers, and providing counselling services for family members of drug abusers.

<u>Project Brief and Progress up to 31 March 2021</u>			
<u>Agency</u>	<u>Project</u>	<u>Approved Grant HK\$</u>	
6 Action for Reach Out	Holistic Wellness : Integrated Anti-drug Service Scheme for Female Sex Workers	2,055,139.00	Project completed. The project aimed at enhancing the knowledge of female sex workers of the harms of drug use and cultivating a healthy lifestyle to lower their risk of drug abuse. Project activities included individual and outreach visits, group activities, hotline and online outreaching, production of anti-drug booklets, provision of counselling and referral service to drug-abusing females. Training workshops for frontline workers from medical, social services and education sectors and peer educators were organised.
7 Caritas - Hong Kong	Project L	5,905,048.00	Project completed. The project aimed at engaging potential young adult female drug abusers for treatment through art therapy. It also aimed at empowering family members, social workers and teachers in supporting drug abusers. Project elements included outreach services, drug awareness and education programmes, drug T&R services integrated with art therapy, time-out sessions and medical assessment/services for drug abusers or their family members. A community-based art therapy workshop and training workshop for social workers and teachers were also organised.
8 Christian New Life Association Limited	「一個不能少」之延續「停不了的使命」	2,738,880.00	Project completed. The project aimed at identifying drug abusers at early stage by peer-led outreaching services. The project had provided training workshops on outreaching skills and counselling theories and skills for rehabilites. After the training, an outreaching team was formed to identify drug abusers for treatment. Different engaging activities were organised for drug abusers and their families. Anti-drug activities and sharing seminars were organised to disseminate anti-drug messages to the general public and prisoners.
9 United Christian Hospital	A Randomized Control Trial to study the effectiveness of the Mobile Functional Cognition Program for persons who substance abuse	4,164,420.00	Project completed. The project aimed at investigating the effectiveness of the Mobile Functional Cognition Program (MFCP) in improving drug abusers' cognitive functioning. The project involved the provision of MFCP (including pre-assessment and recovery planning, mobile functional cognition training and post-assessment and round up) and conventional psychoeducation for drug abusers. Aftercare meetings and case conferences would be conducted with staff from the referral agencies. A study was conducted to compare the cognitive abilities and community functioning of the two groups of drug abusers who received different treatments.

55 Community Drug Advisory Council	Arts Heals – Expressive Arts in Drugs Rehabilitation & Community Health Education	\$473,784.00	Ongoing project. This project aims at providing treatment with the use of expressive arts therapy. Project elements include expressive arts therapy groups, parent-child expressive arts workshops and arts exhibition.
56 Integrated Centre for Wellbeing, the Education University of Hong Kong	DrugFree4Health – EdUHK I-WELL Drug Abuse Prevention Education Program in Tertiary Institutions	\$2,123,278.00	Ongoing project. This project aims at strengthening the anti-drug awareness of Chinese speaking and non-Chinese speaking tertiary students in The Education University of Hong Kong (EdUHK) through in-depth trainings and active participation in drug-related volunteer services for drug rehabilitees. Project elements include anti-drug abuse ambassador scheme, anti-drug curriculum design competitions for students of EdUHK. Trained students will provide service to drug rehabilitees and organise anti-drug talks together with rehabilitees to serve upper primary and secondary students.
57 The Society of Rehabilitation and Crime Prevention, Hong Kong	Project Empathy – Drug Prevention Service Project for Ethnic Minority Parents and The High-risk Youths	\$4,813,760.00	Ongoing project. This project aims at promoting anti-drug knowledge among high-risk youths who are ethnic minorities and their parents/caregivers, encouraging early help-seeking behaviours and facilitating early identification of drug dependent persons within their communities. Emphasis will be placed on prevention of cannabis abuse and improving the participants' understanding of the legal consequences of drug abuse and drug trafficking in Hong Kong. Project elements include physical and online outreach, on-the-spot crisis intervention services and counselling, on-the-spot health check-up, social groups and leisure activities, visits, pre-vocational and vocational training, education youths' group, education and support group for parents/caregivers, follow-up service, referral service and distribution of drug preventive educational publicity items.
58 Po Leung Kuk Student Support Services	Virtual Anti-Drug Scheme	\$1,300,728.00	Ongoing project. This project aims at strengthening tertiary student's anti-drug awareness to cannabis and improving drug knowledge and case management skills of healthcare professionals/social workers. Project elements include anti-drug workshops, health ambassador scheme, AR exhibition and VR activities for tertiary students and AR activities for upper primary students, as well as professional training focusing on harmful effects of cannabis and experience sharing for frontline medical staff and social workers.
